

Partnership with SLNCR

Société Luxembourgeoise de Neurochirurgie et de Chirurgie du Rachis

29, rue de Vianden
L-2680 Luxembourg
contact@neurosurgicalsociety.lu

Dear Sir or Madam,

On July 9, 2024, with the initiative and support of the European Association of Neurosurgical Societies (EANS), the Luxembourgish Society of Neurosurgery and Spine Surgery a.s.b.l. (SLNCR) was founded. Our society currently comprises eleven founding members, all committed to advancing the fields of Neurosurgery and Spine Surgery in Luxembourg and sharing this expertise with professionals and the general public.

Our website, currently under development, will serve as a central platform for members, healthcare professionals, and patients. It will feature detailed information on upcoming events and provide patients with insights into various neurosurgical procedures. Alongside quarterly symposia intended for healthcare professionals, physicians, and the public, we plan to host an annual international scientific event. To keep our members and partners informed, we will also publish a quarterly newsletter covering the latest developments and upcoming events.

SLNCR consists of voting members, including neurosurgeons and orthopedic surgeons specializing in Spine Surgery within Luxembourg. We also welcome "associate members" from all medical specialties, neurosurgery residents, medical students, and anyone with a keen interest in Neurosurgery or Spine Surgery.

To support our activities, develop our website, and organize events, we rely on partnerships. We are reaching out to your company to explore a possible partnership with SLNCR.

We offer the following partnership options which are described in the in the appended document. Furthermore, we are open to suggestions and personal ideas for support.

We would be delighted to answer any questions you may have and look forward to a potential collaboration.

Best regards,

For the SLNCR Board
Dr M. RAKET
Secretary of the Board
